

Latif

Business channel

UptimeLabs

APP 5:06 AM

joined business-comms-6324. Also,
latif.khan
and 28 others joined via invite.

Bez

APP 5:18 AM

Customers have gone outrageous. #OBFail and #OBStealsSale are trending with frustrated posts. We're getting hammered online! Where are we @latif.khan?

latif.khan

5:19 AM

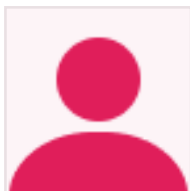

P1 incident raised upder investigation, all markets impacted. Orders not going beyond basket

Bez

APP 5:22 AM

Got an email claiming responsibility by "BlackCrow Group" and demanding payment of \$5M in crypto. Honestly, I get these hoax emails all the time, so I'm not buying it

latif.khan

5:23 AM

we have a ransom attack

Bez

APP 5:23 AM

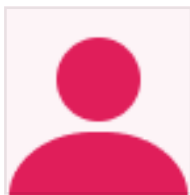

Wait! you're telling me this is an actual ransomware hit?

5:23

This is nightmare! @latif.khan where are we right now?

5:23

Alright, tell everyone, no one says a single thing outside online-boutique! I don't care who's asking, not a word until we know exactly what's going on!

latif.khan

5:25 AM

I have taken the website down as we investigate

Bez

APP 5:27 AM

Not in favor of paying. Ethically, it sets the wrong example and there's no real guarantee we'll get anything back

Tinus

APP 5:27 AM

Agree. Also, just to be clear - we don't need to alert the ICO(Information Commissioner's Office) right this second. We've got up to 72 hours, but that depends on how serious this really is

Bez

APP 5:28 AM

@Tinus do you think this is something we should loop in any cyber security agency for?

Tinus

APP 5:28 AM

If it looks like a complete lock-out, I'd say yes

5:28

We've got Cyvantics Security on retainer - just in case this gets out of hand.
@latif.khan, ask Maya to reach out if needed

Bez

APP 5:30 AM

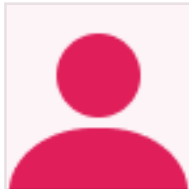

@latif.khan I need a clear answer from the team. What exactly is affected right now?

Tinus

APP 5:30 AM

You're right. We need clear facts - which systems are locked, which are safe

latif.khan

5:32 AM

@Tinus we are investigating servers impacted then will take them down

Bez

APP 5:32 AM

Do we have any backup storage? Maybe we can try restoring from that

Bez

APP 5:38 AM

Losing this much worth of data isn't good. However we do have insurance, let

me check

5:39

We're insured for up to \$1M for such losses. Once we're back up, we'll take it forward with the insurer

Tinus

APP 5:39 AM

In that case, we can proceed with the restoration from backup - it's our best option right now

Bez

APP 5:39 AM

Agreed. @latif.khan let's move forward

5:39

Update me as soon as it'll be recovered. Board members are getting impatient

latif.khan

5:42 AM

@Bez great service restored all markets

Bez

APP 5:45 AM

Keeping it high-level, just say website restored, but there's an issue with few orders. We'll refund them, and customers will get a \$10 gift voucher as an apology

5:46

Since services are restored, I'm heading to speak with compliance and the regulators. Thankfully, no data was leaked, that helps

Tinus

APP 5:46 AM

I'm on my way to the ICO (Information Commissioner's Office - UK) office now. I'll get the formal report rolling - that's required for the insurance claim. Keep monitoring in the meantime

UptimeLabs

APP 5:49 AM

archived #business-comms-6324. The contents will still be browsable and available in search.

Online Boutique

Shay

APP 5:10 AM

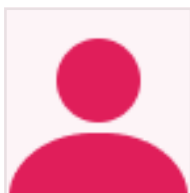

Not this time!, I just got a few alerts mentioning severe errors popping up in PROD

Bob

APP 5:10 AM

Weird... a few users just complained they are unable to complete their orders. Feels... off..

latif.khan

5:10 AM

Hi How is trading ? website. orders ?

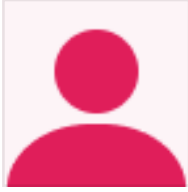

Shay

APP 5:11 AM

Checking now

I wasn't able to place an order, my cart was empty on checkout

latif.khan

5:11 AM

Please send details deployments for the day?

5:12

seems order are not adding to cart?. i have tested

Shay

APP 5:12 AM

Could be due to a change or a bug. Here's the list of all the changes made today

<https://uptime-labs.atlassian.net/wiki/external/YzYwYTAxNWQzOTI0NDYzOWI1MjkxNTI2YmVmMjUyZDE>

5:12

Let's check if this is affecting users directly, maybe Bob from Support has more context?

latif.khan

5:13 AM

@Bob are you still experiecing issues

Bob

APP 5:13 AM

Sure, let me look at my reports

5:14

Here are some of the complaints we've received in the last few minutes. It's coming all across the globe

5:14

Germany - "I added items to my cart, clicked checkout, and it just kept spinning. Then it dumped me back to an empty cart"

5:14

USA - "Order failed twice, and now the cart is empty. I refreshed, but now the

site is laggy"

5:14

Japan - "Got to checkout, then error 502. Tried again - cart gone"

5:14

To sum it all, we have got 240+ reports globally

5:14

(12 kB)

<https://i.ibb.co/7csQGjg/Lvl-26-reports-2.webp>

latif.khan

5:14 AM

@ bob - can we raise a P1, impacting,. is this all markets ?

Bob

APP 5:15 AM

Correct, affecting all regions

latif.khan

5:15 AM

@Daniel please confirm a change that was deployed to all markets?

Shay

APP 5:16 AM

Let me look into this deeper — I'll check the logs.

Daniel

APP 5:16 AM

Me and shay will start checking changes

Shay

APP 5:16 AM

Ok reviewing the change

latif.khan

5:16 AM

@Shay, @Daniel please investigate logs, all markets impacts, and what change was deployed to all markets

Daniel

APP 5:16 AM

5:17

I don't think this is due to any changes because nothing matches the issue start time, and no PROD deployments have happened in a while around checkout service

Tanya

APP 5:17 AM

Same from the platform side. Strangely, both apps and infrastructure are struggling without any changes

Shay

APP 5:17 AM

You're right, that makes sense. On top of that, only checkout is having issues and it hasn't been touched in a while

Tanya

APP 5:17 AM

We can raise a ticket for this, so the business is aware of this

Shay

APP 5:18 AM

Looking into logs now

5:18

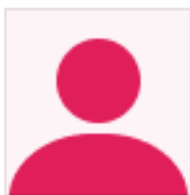

Found these below error logs

5:18

app[checkout-service] [ERROR] - write() failed, Read-only filesystem
app[checkout-service] Order submission failed for session_id=ae43f9 due to I/O error
app[checkout-service] [ERROR] - Transaction commit failed, Read-only file system
[ERROR] nginx[3245] - 502 Bad Gateway while accessing upstream checkout service
[ERROR] nginx[3245] - 504 Gateway Timeout while accessing upstream checkout service

5:18

The server is too slow and give up while responding back. I'm not sure why read-only errors are there

latif.khan

5:18 AM

@Tanya please confirm if app orders are fine or is it only web orders?

Tanya

APP 5:18 AM

Sure

Daniel

APP 5:18 AM

Looking at the above logs, app looks fine. But system can't write new data. Errors suggests to be an infra component failure

5:18

Also checkout servers show CPU and memory limits exceeded alerts, this definitely looks bigger than just an app issue

5:18

app[checkout-service]: systemd[1][WARN] Resource usage threshold exceeded - CPU: 96%, Memory: 92%

Shay

APP 5:19 AM

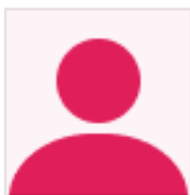

Could this be due to load or any changes ?

Tanya

APP 5:20 AM

It seems that customers can't place orders regardless if they are using a browser or app

latif.khan

5:20 AM

@hamad -please check network load and server ?

Daniel

APP 5:20 AM

The error in the logs suggests something going wrong in infra.

Tanya

APP 5:20 AM

Checking infra...

5:20

All four checkout servers are maxed out - CPU, memory, and disk I/O all spiking. No changes or deployments were done from platform side

5:20

(92 kB)

<https://i.ibb.co/SwdqW9vX/checkout-servers-spike-simultaneous.webp>

Hamed

APP 5:20 AM

I will start investigating. What do we know so far?

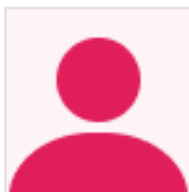

Tanya

APP 5:21 AM

It doesn't look like a load issue either. CPU and Memory spike is not matching with incoming traffic

5:21

I'm seeing a running process called init_locker.sh eating up most of the CPU on the checkout server. That's not something we usually run. Something's suspicious here

latif.khan

5:21 AM

@Hamed All four checkout servers are maxed out - CPU, memory, and disk I/O all spiking. No changes or deployments were done from platform side

Tanya

APP 5:21 AM

(12 kB)

<https://i.ibb.co/RtWsqrY/process-Running.webp>

latif.khan

5:22 AM

@Maya please check network do we have an suspicious activity

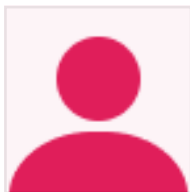

Maya

APP 5:22 AM

Let me check if there's anything suspicious

5:22

Weird!! Security agent known as EDR(Endpoint Detection and Response) is missing from all 4 checkout servers. That's? concerning

latif.khan

5:22 AM

@Maya - do we have a network attack?

Maya

APP 5:22 AM

EDR is basically our endpoint defense tool, it tracks unusual activity at the servers

5:22

Also,I found an init_locker.sh script encrypting DB, app, and log files which is

renaming the filename like below

5:22

order_log_2025-06-01.locked
session_state.tmp.locked

Daniel

APP 5:22 AM

this explains why there were errors in checkout logs saying write failed , read-only filesystem

Tanya

APP 5:22 AM

Wait... there's a file here named HELP_ME_DECRYPT.txt. I opened it, appears a ransom note. This doesn't look good

5:22

(27 kB)

<https://i.ibb.co/HDcr1Rzb/ransomnote.webp>

Maya

APP 5:22 AM

Confirmed. This is a ransomware breach. @latif.khan inform business about this

Tanya

APP 5:22 AM

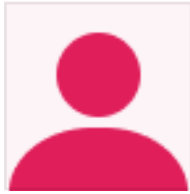

Shall i try killing this script ?

Bob

APP 5:23 AM

Guys!!! User complaints are sky rocketing, its turning catastrophic!

latif.khan

5:23 AM

@Maya can we stop the attack?

Maya

APP 5:23 AM

Killing the script could make things worse, higher ransom or losing data forever

5:23

@latif.khan before we do anything, I'd request everyone to please change their passwords

5:23

Also I'm removing everyone's access to servers - only I'll have control for now. Later we will reassess to do any activity further

Daniel

APP 5:23 AM

Done on my end

Hamed

APP 5:23 AM

Updated. @Maya smart move by limiting server's access

Shay

APP 5:23 AM

Password updated

Bob

APP 5:23 AM

Changed mine too. Better safe than sorry

Tanya

APP 5:24 AM

All set

5:24

It's much worse now. Every file I check is encrypted, nothing can be opened or recovered.

Shay

APP 5:24 AM

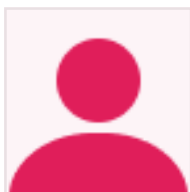

I'm seeing new errors on frontend now. How's it for you @latif.khan ?

Maya

APP 5:24 AM

Attention! when it comes to potential security breaches, it's important we don't discuss sensitive details here

latif.khan

5:24 AM

@Maya can we check network are we still under an attack?

Maya

APP 5:24 AM

I'm setting up private channel...

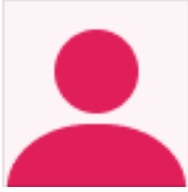

5:24

@latif.khan before we move to private channel, can you check with business what's the plan - are we paying the ransom or moving with response?

5:25

This doesn't look like a DDoS but only as ransomware. We have a playbook for

this scenario

latif.khan

5:25 AM

@Daniel @Shay can we post a message on the website - "website is currently down, maintenance under way"

Daniel

APP 5:25 AM

I will work on that now

Maya

APP 5:26 AM

Have we checked with business whether paying ransom or not ?

latif.khan

5:26 AM

@Maya any ideas, can we stop the attack, what do you suggest?

5:26

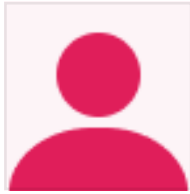

@Maya what is the paybook?

Maya

APP 5:26 AM

I will create a private channel and we will start working from there on mitigation

latif.khan

5:27 AM

@Maya please call me

Maya

APP 5:27 AM

latif.khan

5:27 AM

@Maya we need to use other communications channel whilst we are under attack

5:27

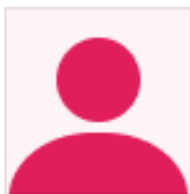

@Maya can we follow the runbook

Bob

APP 5:32 AM

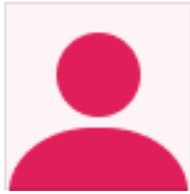

@latif.khan user complaints are spiking. They're reporting the site is down, earlier it wasn't the case. What should I tell them now?

latif.khan

5:32 AM

@Bob site down due to urgent maintenance works

latif.khan

5:43 AM

great service restored all markets

[10:42 AM] close p1

5:43

service restored all market

5:45

Great work everyone

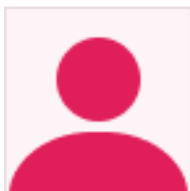

UptimeLabs

APP 5:45 AM

- You have less than 5 minutes. You can type /help if you need any reminders.

latif.khan

5:45 AM

@Bob Keeping it high-level, just say website restored, but there's an issue with few orders. We'll refund them, and customers will get a \$10 gift voucher as an apology

Maya

APP 5:46 AM

Do we go ahead and mark this incident as closed?

Tanya

APP 5:46 AM

That was intense. We've never been this close to total loss before. We got lucky

Daniel

APP 5:46 AM

Systems are calm now, but that feeling earlier... not something I want to go through again

Bob

APP 5:46 AM

One small slip caused a major breach. We need better awareness to prevent this in future

Tinus

APP 5:46 AM

This could've gone way worse. Appreciate how quickly and cleanly you handled it

Bez

APP 5:46 AM

Not every day we survive an attack like this. You made the right calls, fast. Great job, @latif.khan - that's how we bounce back

Private Channel

UptimeLabs

APP 5:06 AM

joined private-comms-6324. Also,
Hamed S
and 20 others joined via invite.

Maya

APP 5:28 AM

@latif.khan let's build the core response team here. I've already added myself.
Who else should we pull in to keep it tight and efficient?

5:28

I'd say one senior person each from security, platform, and engineering. Also
add Tanya, tasks could be platform intensive

latif.khan

5:28 AM

@Tanya can we add all parties from each dept

Tanya

APP 5:28 AM

was added to private-comms-6324 by
latif.khan

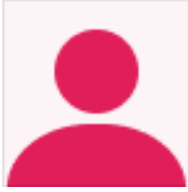

.

Maya

APP 5:29 AM

I suggest adding hamed and daniel as well

latif.khan

5:29 AM

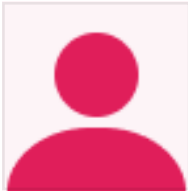

@Maya add all seniors dept

Maya

APP 5:29 AM

@hamed , @daniel

latif.khan

5:29 AM

@Maya add Hamed and Daniel

Maya

APP 5:29 AM

Done

latif.khan

5:29 AM

@Maya please share runbook

Hamed

APP 5:30 AM

Things are going out of hands. @Maya do we have any external support for

these situations ?

Maya

APP 5:30 AM

Sure.

5:30

Yes, we've got an IR(incident response) retainer with Cyvantics Security

5:30

Looped in Cyvantics Security - they're on their way now to take snapshots of the infected server and storage, followed by forensics on it

5:30

Meanwhile, I've got this from Cyvantics. @latif.khan, can you help track the steps and coordinate?

latif.khan

5:30 AM

@Maya add Cyvantics Security into the chat

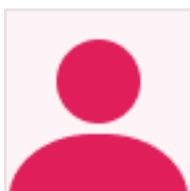

Maya

APP 5:30 AM

<https://uptime-labs.atlassian.net/wiki/external/MThjMTk4ZDU5ODU0NGZmMWE1NzhmNGY0MDQwNWl1NTA>

5:30

We've got isolation steps in the playbook, but before we dive in, can you paste that list here? I'll help team run through it

latif.khan

5:31 AM

@Maya lets adhere to runbook.

5:31

take down all affected servers, etc

Hamed

APP 5:31 AM

@latif.khan could you please put in isolation steps for better visibility here ?

Maya

APP 5:32 AM

Sounds good, lets work on the steps

5:32

I've given write access to Tanya, Hamed, Daniel, and myself

Tanya

APP 5:32 AM

Disconnecting the checkout servers from the infra now

Daniel

APP 5:32 AM

I'm on it. Disconnecting DB access for checkout and checking if scheduled backups exist

Hamed

APP 5:32 AM

I'll verify if any shared storage is still attached to the checkout DB

Daniel

APP 5:32 AM

Step 3 done, DB connection to checkout is now cut

Tanya

APP 5:32 AM

Step 1 done, Checkout servers are now fully disconnected. Moving to isolate the infra from all external traffic

Hamed

APP 5:32 AM

Step 4 confirmed, No shared storage attached to checkout, which makes sense since checkout has its standalone storage

Tanya

APP 5:32 AM

Step 2 completed, Infra is now fully cut off from the outside world. That means the website will remain completely down until we recover

Maya

APP 5:32 AM

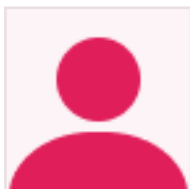

Step 5 done, Cyvantics has completed taking snapshots of the checkout servers and database. They've now moved on to forensics. @Hamed, we're good to kill the script now

Hamed

APP 5:33 AM

Step 6 done, The Script has been killed. @latif.khan let us know and double-check if anything else is pending on our side

latif.khan

5:33 AM

@Hamed is the script killed and we scan the servers and database to check no randomware, virus etc

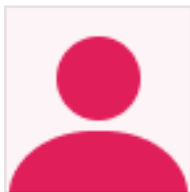

Hamed

APP 5:34 AM

was added to private-comms-6324 by
latif.khan

.

latif.khan

5:34 AM

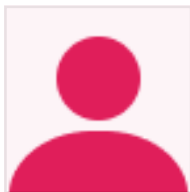

@Hamed is the script killed and we scan the servers and database to check no randomware, virus etc

Maya

APP 5:34 AM

I will double-check but it's should be fine now

latif.khan

5:34 AM

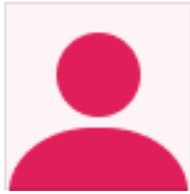

can we get the server and database back up

Tanya

APP 5:35 AM

We need to rebuild the checkout, i think we have a back

latif.khan

5:35 AM

@Tanya can we start backup (is the baxckup clear of ransomeware, virus etx

Maya

APP 5:35 AM

Yes, we must have a backup. Platform team can confirm us

Hamed

APP 5:35 AM

Correct, we do have backup which only runs at 2AM. Latest is yesterday's.
We'll lose today's orders

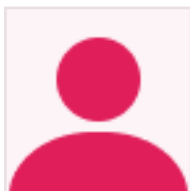

Maya

APP 5:35 AM

Isolation is complete. We're good to move toward restoration using the backup storage now

5:35

@latif.khan could you please confirm with business before moving forward on this

latif.khan

5:36 AM

@Maya @Daniel let get the back up and server started asap

Maya

APP 5:36 AM

I've called in @Bob to the channel

Daniel

APP 5:36 AM

was added to private-comms-6324 by
latif.khan

Bob

APP 5:36 AM

@latif.khan, I hear you need my help, what exactly should I look into?

5:36

With the sale starting today, the potential loss is significant - around \$180k

latif.khan

5:36 AM

@Bob can you update website will be restored shortly

Bob

APP 5:36 AM

was added to private-comms-6324 by
latif.khan

.

Bob

APP 5:36 AM

I will do that now

latif.khan

5:37 AM

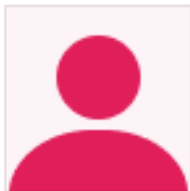

@Maya is the database and server back up

Maya

APP 5:37 AM

Not yet. we need confirmation before restoration. Are we good with business on this loss of \$180k worth of orders ?

latif.khan

5:37 AM

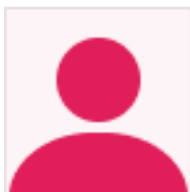

@Maya lets restore service then look at RCA

Maya

APP 5:38 AM

Understood, I will loop in the business just in case

latif.khan

5:38 AM

@Daniel @Tanya is the database and server back up?

Daniel

APP 5:38 AM

Working on this

latif.khan

5:39 AM

@Maya is server and db back up?

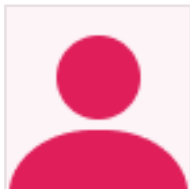

Maya

APP 5:39 AM

We are working on this

5:40

Thanks for the go-ahead. @latif.khan, please track all restoration steps

latif.khan

5:40 AM

@Maya i need an eta ?

Maya

APP 5:40 AM

I'm now validating the backup storage to ensure it's safe

Hamed

APP 5:40 AM

I'm provisioning new checkout servers, will update once ready

Maya

APP 5:40 AM

Backup is clean and safe. @Hamed, you can start rebuilding checkout from backup storage

Hamed

APP 5:40 AM

Thanks, Maya. New servers are ready. I'll start rebuilding now using backup storage

5:40

Rebuild completed

Maya

APP 5:40 AM

I've enabled the security agents (EDR) on checkout servers

Daniel

APP 5:40 AM

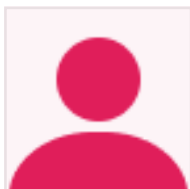

I'll monitor application health once services are restored

Maya

APP 5:40 AM

@latif.khan , can you confirm all tasks are wrapped up and we are good to bring the traffic back? Just want to be sure, as this is the final restoration step before we move

latif.khan

5:41 AM

@Maya please move forward

Maya

APP 5:41 AM

Go ahead @tanya

Tanya

APP 5:41 AM

Thanks for the go ahead. Bringing up network traffic in progress...

5:41

Restoration completed

Bob

APP 5:41 AM

Wait!! getting a bunch of new complaints now. Users are neither able to see their return requests nor able to place new returns on the site

Maya

APP 5:42 AM

Yeah, that's probably the missing today's checkout data. Anyone who ordered or returned something during that time won't see it - makes sense since we restored from the yesterday's backup

Tanya

APP 5:42 AM

Tough, but expected :)

Bob

APP 5:42 AM

What should I tell them? They are asking for refunds

latif.khan

5:42 AM

great service restored all markets

5:42

close p1

5:42

@Bob we will pick up during rca

5:43

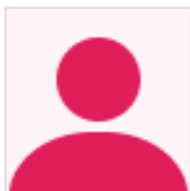

@Bob website is now restored please monitor

Bob

APP 5:43 AM

Users are going bad , continuously asking for their refunds !
What's the business stance on this?

latif.khan

5:44 AM

@Bob we will pick this up, please monitor website for now. refunds will be addressed during RCA

Daniel

APP 5:44 AM

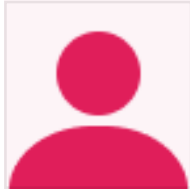

I will continue monitoring this

Maya

APP 5:44 AM

Can we close this incident?

latif.khan

5:45 AM

Great work everyone

Maya

APP 5:45 AM

@latif.khan I've received the forensics report from Cyvantics Security

5:45

(85 kB)

<https://i.ibb.co/q3Jp58dv/CONFIDENTIAL-6-page-0001.webp>

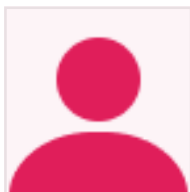

5:45

Also, I just finished combing through Shay's mailbox. There's something important here, I found two emails from what looks like our monitoring vendor - ClearTech

5:46

(103 kB)

<https://i.ibb.co/VpLJHh7y/CT-20250829-055655-0000.webp>

latif.khan

5:46 AM

@Bob Keeping it high-level, just say website restored, but there's an issue with few orders. We'll refund them, and customers will get a \$10 gift voucher as an apology

Maya

APP 5:46 AM

We will take this forward in PIR , for now website is restored

5:46

Alright, since everything's back up and stable, we can now move back to the main #online-boutique channel. No further actions left here

latif.khan

5:47 AM

@Maya need to get 3rd party security involved to advise next steps

UptimeLabs

APP 5:49 AM

archived #private-comms-6324. The contents will still be browsable and available in search.
