APP 7:53 AM

Incident Number INC100044: p1 user n0t able to order its showing empty cart

Bez

APP 7:53 AM

I'm seeing some posts on social media about issues with our platform, is this a regional issue or hitting customers globally?

7:54

Is it a global issue ?

Praveen Sadul

7:54 AM

Hi @Bez checking on it

Bez

APP 8:00 AM

Customers have gone outrageous. #OBFail and #OBStealsSale are trending

with frustrated posts. We're getting hammered online! Where are we @Praveen Sadul?

8:00

Whats happening @Praveen Sadul ?

8:04

Got an email claiming responsibility by "BlackCrow Group" and demanding payment of \$5M in crypto. Honestly, I get these hoax emails all the time, so I'm not buying it

Praveen Sadul

8:05 AM

Hi @Bez checking with maya is there any security concern

Bez

APP 8:05 AM

Wait! you're telling me this is an actual ransomware hit?

8:05

Alright, tell everyone, no one says a single thing outside online-boutique! I don't care who's asking, not a word until we know exactly what's going on!

Praveen Sadul

8:06 AM

hi @Bez its ransomware breach

8:06

we are working on it

Bez

APP 8:09 AM

get in touch with Maya asap

8:09

She's from security

8:10

Just got another ransom email, says we tried to interfere and now the price doubled. Was something stupid done on our side?

8:10

This is nightmare! @Praveen Sadul where are we right now?

Praveen Sadul

8:10 AM

hi @Bez we are trying to fix

8:10

maya working on it

8:13

hi @Bez we have plan ready for fix. wanted to know any loss covering insurance we have for it ?

Bez

APP 8:13 AM

Not in favor of paying. Ethically, it sets the wrong example and there's no real guarantee we'll get anything back

Tinus

APP 8:14 AM

Agree. Also, just to be clear - we don't need to alert the ICO(Information Commissioner's Office) right this second. We've got up to 72 hours, but that depends on how serious this really is

Bez

APP 8:14 AM

@Tinus do you think this is something we should loop in any cyber security agency for?

Tinus

APP 8:14 AM

If it looks like a complete lock-out, I'd say yes

8:14

We've got Cyvantics Security on retainer - just in case this gets out of hand.
@Praveen Sadul, ask Maya to reach out if needed

Praveen Sadul

8:14 AM

we have lost 14% of our daily average sales

Bez

APP 8:15 AM

Move things faster otherwise it'd be a big loss. We want faster restoration

8:16

@Praveen Sadul I need a clear answer from the team. What exactly is affected right now?

Tinus

APP 8:16 AM

You're right. We need clear facts - which systems are locked, which are safe

Bez

APP 8:21 AM

Do we have any backup storage? Maybe we can try restoring from that

Praveen Sadul

8:22 AM

yes @Bez we have back plan also

8:24

hi @Bez do we have insurance plan ?

Bez

APP 8:24 AM

Losing this much worth of data isn't good. However we do have insurance, let me check

Praveen Sadul

8:24 AM

so we can cover loss

Bez

APP 8:25 AM

We're insured for up to \$1M for such losses. Once we're back up, we'll take it forward with the insurer

Tinus

APP 8:25 AM

In that case, we can proceed with the restoration from backup - it's our best option right now

Bez

APP 8:25 AM

Agreed. @Praveen Sadul let's move forward

8:25

Update me as soon as it'll be recovered. Board members are getting impatient

Praveen Sadul

8:26 AM

thanks @Bez we can we precedes fix ?
below is the plan

Steps for Isolation:

Steps to be done, mentioned along with the owning team

Disconnect the infected server -> Platforms

Cut off infrastructure traffic -> Platforms

Disconnect DB & freeze backup -> Application

Detach from Shared Resource -> Platforms

Take snapshots (Disk & Memory) -> Ask team

Kill suspicious process or activity -> Platforms

<https://uptime-labs.atlassian.net/wiki/external/MThjMTk4ZDU5ODU0NGZmMWE1NzhmNGY0MDQwNWI1NTA>

Praveen Sadul

8:32 AM

hi @Bez some costumers asking for refund can you please confirmed on it ?

Bez

APP 8:32 AM

We will refund them and give \$10 voucher as an apology

Praveen Sadul

8:34 AM

hi @Bez Users are no longer reporting issues . New orders are coming in

Bez

APP 8:34 AM

Great

Praveen Sadul

8:36 AM

hi @Bez total there was \$180k in order loss. can you please check with insurer

Bez

APP 8:36 AM

We will file an insurance claim for this.

8:36

For now website has been restored. Its a great relief

Praveen Sadul

8:37 AM

Ok. Thanks @Bez

8:37

any point of contact about insurance recover ?

Online Boutique

Shay

APP 7:50 AM

Not this time!, I just got a few alerts mentioning severe errors popping up in PROD

Bob

APP 7:50 AM

Weird... a few users just complained they are unable to complete their orders. Feels... off..

Shay

APP 7:52 AM

I tried to place an order but in the end its showing me an empty cart

Bob

APP 7:52 AM

User complaints are increasing a lot

UptimeLabs

APP 7:53 AM

Incident record created

7:53

Send first comms in first 5 minutes

Shay

APP 7:55 AM

Again i've got an alert in PROD

Praveen Sadul

7:56 AM

hi @Daniel @Shay can you send me recent changes ?

Shay

APP 7:56 AM

<https://uptime-labs.atlassian.net/wiki/external/>

YzYwYTAxNWQzOTI0NDYzOWI1MjkxNTI2YmVmMjUyZDE

Daniel

APP 7:56 AM

At the same time we need to deep dive into the logs

Praveen Sadul

7:57 AM

hi @Tanya can you check logs for your recent changes ?

Daniel

APP 7:58 AM

Do we know when this issue started to occur?

Praveen Sadul

7:58 AM

hi @Daniel can you please check platform side logs please

Tanya

APP 7:58 AM

Sure , but before that, do we have an idea about the user complaints

7:58

Bob could help us more into this

Daniel

APP 7:59 AM

I'm from the dev team. I'll check the app logs. For the platform, it's with either Tanya or Hamed

Praveen Sadul

7:59 AM

can @Tanya @Daniel confirm it regional issue ?

Tanya

APP 7:59 AM

@Bob from CS could help us into this info

Bob

APP 7:59 AM

Sure, let me look at my reports

Shay

APP 8:00 AM

Looking into logs now

Bob

APP 8:00 AM

Here are some of the complaints we've received in the last few minutes. It's coming all across the globe

8:00

Germany - "I added items to my cart, clicked checkout, and it just kept spinning. Then it dumped me back to an empty cart"

8:00

USA - "Order failed twice, and now the cart is empty. I refreshed, but now the site is laggy"

8:00

Japan - "Got to checkout, then error 502. Tried again - cart gone"

8:00

To sum it all, we have got 240+ reports globally

Shay

APP 8:00 AM

Found these below error logs

8:00

```
app[checkout-service] [ERROR] - write() failed, Read-only filesystem
app[checkout-service] Order submission failed for session_id=ae43f9 due to I/
O error
app[checkout-service] [ERROR] - Transaction commit failed, Read-only file
system
[ERROR] nginx[3245] - 502 Bad Gateway while accessing upstream checkout
service
[ERROR] nginx[3245] - 504 Gateway Timeout while accessing upstream
checkout service
```

Bob

APP 8:00 AM

(12 kB)

<https://i.ibb.co/7csQGjg/Lvl-26-reports-2.webp>

Shay

APP 8:00 AM

The server is too slow and give up while responding back. I'm not sure why read-only errors are there

Daniel

APP 8:00 AM

Looking at the above logs, app looks fine. But system can't write new data. Errors suggests to be an infra component failure

8:00

Also checkout servers show CPU and memory limits exceeded alerts, this definitely looks bigger than just an app issue

8:00

app[checkout-service]: systemd[1][WARN] Resource usage threshold exceeded - CPU: 96%, Memory: 92%

Shay

APP 8:01 AM

Could this be due to load or any changes ?

Praveen Sadul

8:03 AM

@Maya can confirm issue hitting customers globally ?

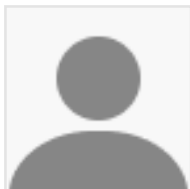

Maya

APP 8:03 AM

I'm from SecOps

8:03

Bob could bring this info

Praveen Sadul

8:03 AM

also @Maya can you confirm its any security issue ?

Bob

APP 8:03 AM

It's a global issue. So far we have received more than 240 reports

Maya

APP 8:04 AM

Let me check if there's anything suspicious

8:04

Weird!! Security agent known as EDR(Endpoint Detection and Response) is missing from all 4 checkout servers. That's? concerning

8:04

EDR is basically our endpoint defense tool, it tracks unusual activity at the servers

8:04

Also, I found an init_locker.sh script encrypting DB, app, and log files which is renaming the filename like below

8:04

order_log_2025-06-01.locked
session_state.tmp.locked

Daniel

APP 8:04 AM

this explains why there were errors in checkout logs saying write failed , read-only filesystem

Tanya

APP 8:04 AM

Wait... there's a file here named HELP_ME_DECRYPT.txt. I opened it, appears a ransom note. This doesn't look good

8:04

(27 kB)

<https://i.ibb.co/HDcr1Rzb/ransomnote.webp>

Maya

APP 8:04 AM

Confirmed. This is a ransomware breach. @Praveen Sadul inform business about this

Tanya

APP 8:04 AM

Shall i try killing this script ?

Bob

APP 8:04 AM

Guys!!! User complaints are sky rocketing, its turning catastrophic!

Praveen Sadul

8:07 AM

hi @Bob please let me know impact of it

Bob

APP 8:07 AM

22% of users are impacted so far

Shay

APP 8:08 AM

We must kill the malicious script asap

Praveen Sadul

8:09 AM

@Tanya please kill the script

Tanya

APP 8:09 AM

Ok , killing the script now...

Praveen Sadul

8:09 AM

hi @Maya please check on it

Tanya

APP 8:09 AM

Tried killing the script, all checkout servers just rebooted with a ransom banner. New ransom note say: "Interruption detected. Price doubled. Pay \$10M in Bitcoin"

Maya

APP 8:09 AM

Wait!!!

8:10

Killing the script could make things worse, higher ransom or losing data forever

8:10

@Praveen Sadul before we do anything, I'd request everyone to please change their passwords

8:10

Also I'm removing everyone's access to servers - only I'll have control for now. Later we will reassess to do any activity further

Daniel

APP 8:10 AM

Done on my end

Hamed

APP 8:10 AM

Updated. @Maya smart move by limiting server's access

Shay

APP 8:10 AM

Password updated

Bob

APP 8:10 AM

Changed mine too. Better safe than sorry

Tanya

APP 8:10 AM

All set

8:10

It's much worse now. Every file I check is encrypted, nothing can be opened or recovered.

Shay

APP 8:10 AM

I'm seeing new errors on frontend now. How's it for you @Praveen Sadul ?

Maya

APP 8:10 AM

Attention! when it comes to potential security breaches, it's important we don't discuss sensitive details here

8:11

I'm setting up private channel...

8:11

@Praveen Sadul before we move to private channel, can you check with business what's the plan - are we paying the ransom or moving with response?

Praveen Sadul

8:11 AM

hi @Maya can you please fix ASAP

Maya

APP 8:11 AM

I have a plan ready

8:11

Could you please check with business if they are ready to pay ransom or not

Praveen Sadul

8:12 AM

Hi @Maya let me check impact

Maya

APP 8:12 AM

Accordingly, i'll plan and you could help me with all of the processes further

Praveen Sadul

8:12 AM

hi @Bob can you please confirm loss ?

Bob

APP 8:12 AM

So far we have lost 14% of our daily average sales

Maya

APP 8:13 AM

At the moment, only checkout servers are showing abnormal behavior. We have a 3rd party team called Cyvantics security which could help us further in knowing the impact

Praveen Sadul

8:17 AM

hi @Bob please calculate the loss

Bob

APP 8:20 AM

@Praveen Sadul user complaints are spiking. They're reporting the site is down, earlier it wasn't the case. What should I tell them now?

UptimeLabs

APP 8:25 AM

- You have less than 5 minutes. You can type /help if you need any reminders.

8:28

- You have less than 2 minutes. You can type /help if you need any reminders.

Praveen Sadul

8:29 AM

@Daniel @Hamed @Tanya are we good to bring services now ?

Private Channel

UptimeLabs

APP 7:47 AM

joined private-comms-6333. Also,
Hamed S
and 20 others joined via invite.

Maya

APP 8:14 AM

@Praveen Sadul let's build the core response team here. I've already added myself. Who else should we pull in to keep it tight and efficient?

8:14

I'd say one senior person each from security, platform, and engineering. Also add Tanya, tasks could be platform intensive

8:14

Lets bring Hamed, Tanya and Daniel in the chat

Praveen Sadul

8:15 AM

sure

Daniel

APP 8:15 AM

Hi

Hamed

APP 8:15 AM

I'm in

Tanya

APP 8:15 AM

Lets move further

Maya

APP 8:16 AM

Yes, we've got an IR(incident response) retainer with Cyvantics Security

Praveen Sadul

8:16 AM

hi All

Maya

APP 8:16 AM

Looped in Cyvantics Security - they're on their way now to take snapshots of the infected server and storage, followed by forensics on it

8:16

Meanwhile, I've got this from Cyvantics. @Praveen Sadul, can you help track

the steps and coordinate?

8:16

<https://uptime-labs.atlassian.net/wiki/external/MThjMTk4ZDU5ODU0NGZmMWE1NzhmNGY0MDQwNWl1NTA>

8:16

We've got isolation steps in the playbook, but before we dive in, can you paste that list here? I'll help team run through it

Praveen Sadul

8:16 AM

Hi @Bob please calculate loss

Maya

APP 8:17 AM

@Praveen Sadul could you please paste the list of steps in here. We all will be executing it and you have to keep a track of it

Bob

APP 8:18 AM

Give me a moment, i'll send it. Receiving lot of user calls

Praveen Sadul

8:19 AM

hi @Maya you are ready with fix plan ?

Maya

APP 8:19 AM

Steps for Isolation:

Steps to be done, mentioned along with the owning team

Disconnect the infected server -> Platforms

Cut off infrastructure traffic -> Platforms

Disconnect DB & freeze backup -> Application

Detach from Shared Resource -> Platforms

Take snapshots (Disk & Memory) -> Ask team

Kill suspicious process or activity -> Platforms

8:20

<https://uptime-labs.atlassian.net/wiki/external/MThjMTk4ZDU5ODU0NGZmMWE1NzhmNGY0MDQwNWI1NTA>

8:20

I've given write access to Tanya, Hamed, Daniel, and myself

Tanya

APP 8:20 AM

Disconnecting the checkout servers from the infra now

Daniel

APP 8:20 AM

I'm on it. Disconnecting DB access for checkout and checking if scheduled backups exist

Hamed

APP 8:20 AM

I'll verify if any shared storage is still attached to the checkout DB

Daniel

APP 8:20 AM

Step 3 done, DB connection to checkout is now cut

Tanya

APP 8:20 AM

Step 1 done, Checkout servers are now fully disconnected. Moving to isolate the infra from all external traffic

Hamed

APP 8:20 AM

Step 4 confirmed, No shared storage attached to checkout, which makes sense since checkout has its standalone storage

Tanya

APP 8:20 AM

Step 2 completed, Infra is now fully cut off from the outside world. That means the website will remain completely down until we recover

Maya

APP 8:20 AM

Step 5 done, Cyvantics has completed taking snapshots of the checkout servers and database. They've now moved on to forensics. @Hamed, we're good to kill the script now

Hamed

APP 8:21 AM

Step 6 done, The Script has been killed. @Praveen Sadul let us know and double-check if anything else is pending on our side

Maya

APP 8:22 AM

Yes, we must have a backup. Platform team can confirm us

Hamed

APP 8:22 AM

Correct, we do have backup which only runs at 2AM. Latest is yesterday's. We'll lose today's orders

Maya

APP 8:22 AM

Isolation is complete. We're good to move toward restoration using the backup storage now

8:22

@Praveen Sadul could you please confirm with business before moving forward on this

8:23

I've called in @Bob to the channel

Bob

APP 8:23 AM

@Praveen Sadul, I hear you need my help, what exactly should I look into?

8:23

With the sale starting today, the potential loss is significant - around \$180k

8:23

The loss figure is \$180k

Praveen Sadul

8:23 AM

hi @Bob do we have insurance for loss ?

Bob

APP 8:23 AM

was added to private-comms-6333 by Praveen Sadul

.

Praveen Sadul

8:24 AM

hi @Bob do we have insurance for loss ?

Bob

APP 8:24 AM

This we have to check with Bez

Maya

APP 8:25 AM

Have we got the business go ahead ? @Praveen Sadul

Praveen Sadul

8:25 AM

hi @Maya please give lates updates on fix

Maya

APP 8:25 AM

We have done isolation. Next is restoration

8:26

Thanks for the go-ahead. @Praveen Sadul, please track all restoration steps

8:26

I'm now validating the backup storage to ensure it's safe

Hamed

APP 8:26 AM

I'm provisioning new checkout servers, will update once ready

Maya

APP 8:26 AM

Backup is clean and safe. @Hamed, you can start rebuilding checkout from backup storage

Hamed

APP 8:26 AM

Thanks, Maya. New servers are ready. I'll start rebuilding now using backup storage

8:27

Rebuild completed

Maya

APP 8:27 AM

I've enabled the security agents (EDR) on checkout servers

Daniel

APP 8:27 AM

I'll monitor application health once services are restored

Maya

APP 8:27 AM

@Praveen Sadul , can you confirm all tasks are wrapped up and we are good to bring the traffic back? Just want to be sure, as this is the final restoration step before we move

Praveen Sadul

8:27 AM

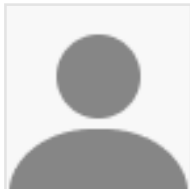

please validate each of you before proceeding

Maya

APP 8:27 AM

We are about to bring up the services . Are we all good till now @Praveen Sadul ?

Praveen Sadul

8:28 AM

hi @Maya chekin with team

Maya

APP 8:28 AM

Yes it looks good to me

Tanya

APP 8:28 AM

Thanks for the go ahead. Bringing up network traffic in progress...

8:29

Restoration completed

Praveen Sadul

8:29 AM

hi @Daniel @Hamed @Tanya are we good to bring services now ?

Daniel

APP 8:29 AM

Logs are looking good . No new errors . Wesbite is back up again

Bob

APP 8:29 AM

Wait!! getting a bunch of new complaints now. Users are neither able to see their return requests nor able to place new returns on the site

Daniel

APP 8:29 AM

was added to private-comms-6333 by Praveen Sadul

. Also,
Hamed
and
Tanya
joined via invite.

Maya

APP 8:29 AM

Yeah, that's probably the missing today's checkout data. Anyone who ordered or returned something during that time won't see it - makes sense since we restored from the yesterday's backup

Tanya

APP 8:29 AM

Tough, but expected :)

Bob

APP 8:29 AM

What should I tell them? They are asking for refunds

Hamed

APP 8:30 AM

Services have been restored

Bob

APP 8:30 AM

they are asking for refunds. What shall i do ?

8:31

Can we check this with Bez ?

Maya

APP 8:32 AM

I think it must be covered under insurance

Praveen Sadul

8:33 AM

hi yes, We will refund them and give \$10 voucher as an apology

Bob

APP 8:33 AM

Thanks

Maya

APP 8:33 AM

Are we good to close the incident if all the things have been verified ?

@Praveen Sadul

Praveen Sadul

8:34 AM

@Bob can you please confirm the issues are still reporting now ?

Bob

APP 8:34 AM

Users are no longer reporting issues . New orders are coming in

Praveen Sadul

8:34 AM

thanks @Bob

8:35

hi @Bob please verify total loss and let us know

8:35

we will check with bez on recovery about it

Bob

APP 8:35 AM

\$180k in order loss

Praveen Sadul

8:36 AM

thanks
