Business Channel

UptimeLabs

APP 9:10 AM

joined business-comms-6224. Also, swetha.nayudu and 28 others joined via invite.

swetha.nayudu

9:13 AM

Hi Bez , we have got some complains from custmers unable to complete orders

Bez

APP 9:13 AM

Customers have gone outrageous. #OBFail and #OBStealsSale are trending with frustrated posts. We're getting hammered online! Where are we @Swetha Nayudu?

swetha.nayudu

9:16 AM

team is looing into this now

Bez

APP 9:17 AM

Got an email claiming responsibility by "BlackCrow Group" and demanding

payment of \$5M in crypto. Honestly, I get these hoax emails all the time, so I'm not buying it

swetha.nayudu

9:18 AM

we are checeking if its the security issue ..

9:18

something suspicious

9:18

there is a ransome breach

9:19

Shall we make the site down until we resolve this ?

Bez

APP 9:19 AM

Wait! you're telling me this is an actual ransomware hit?

9:19

Alright, tell everyone, no one says a single thing outside online-boutique! I don't care who's asking, not a word until we know exactly what's going on!

9:19

Yes, if we can get a holding page in place, that would be great

9:20

This is nightmare! @Swetha Nayudu where are we right now?

swetha.nayudu

9:20 AM

@Bob we are requesting to cahnge pwd for all of us immediately

9:21

@Bez we are requesting to cahnge pwd for all of us immediately

9:22

@Bez - what woud be the decision on the breech ?

Bez

APP 9:22 AM

Not in favor of paying. Ethically, it sets the wrong example and there's no real guarantee we'll get anything back

1

Tinus

APP 9:22 AM

Agree. Also, just to be clear - we don't need to alert the ICO (Information Commissioner's Office) right this second. We've got up to 72 hours, but that depends on how serious this really is

Bez

APP 9:23 AM

@Tinus do you think this is something we should loop in any cyber security agency for?

Tinus

APP 9:23 AM

If it looks like a complete lock-out, I'd say yes

9:23

We've got Cyvantics Security on retainer - just in case this gets out of hand.
@Swetha Nayudu, ask Maya to reach out if needed

swetha.nayudu

9:23 AM

Sure , we have now moved to private channel as they can monitor us .. can I request you both to join us there

Tinus

APP 9:24 AM

This channel is secured. Nothing to worry about since we always discuss sensitive data here

Bez

APP 9:25 AM

@Swetha Nayudu I need a clear answer from the team. What exactly is affected right now?

Tinus

APP 9:25 AM

You're right. We need clear facts - which systems are locked, which are safe

Bez

APP 9:26 AM

Do we have any backup storage? Maybe we can try restoring from that

swetha.nayudu

9:28 AM

we are doing that @Bez

9:29

we are restoring the system.

9:29

effect - Users are unable to complete orders

9:29

UptimeLabs

help_me_decrypt

[View original message](#)

Posted in [online-boutique-6224 \(archived\)](#) | [Oct 8th](#) | [View message](#)

9:31

@Bez We have a situation where system back up will be upto 2 AM

and we will loose all orders worth loss of \$180K

9:32

are you happy for us to get the restoration ?

Bez

APP 9:32 AM

Losing this much worth of data isn't good. However we do have insurance, let me check

swetha.nayudu

9:32 AM

Sure

Bez

APP 9:32 AM

We're insured for up to \$1M for such losses. Once we're back up, we'll take it forward with the insurer

Tinus

APP 9:32 AM

In that case, we can proceed with the restoration from backup - it's our best option right now

1

Bez

APP 9:32 AM

Agreed. @Swetha Nayudu let's move forward

9:32

Update me as soon as it'll be recovered. Board members are getting impatient

1

swetha.nayudu

9:34 AM

we are restoring services

9:35

we have restored servers - we are opening 10% of traffic

9:38

@Bez - please see above

9:39

@Bez - we are now to 30 % traffic site is up

9:40

@Bez - probably the missing today's checkout data. Anyone who ordered or returned something during that time won't see it - makes sense since we restored from the yesterday's backup and customer are calling us for refunds what shall we tell them ?

Bez

APP 9:40 AM

Keeping it high-level, just say website restored, but there's an issue with few orders. We'll refund them, and customers will get a \$10 gift voucher as an apology

swetha.nayudu

APP 9:43 AM

Incident Number INC100072: resolved

Bez

APP 9:43 AM

Since services are restored, I'm heading to speak with compliance and the regulators. Thankfully, no data was leaked, that helps

Tinus

APP 9:43 AM

I'm on my way to the ICO (Information Commissioner's Office - UK) office now. I'll get the formal report rolling - that's required for the insurance claim. Keep monitoring in the meantime

swetha.nayudu

9:43 AM

Thank you @Bez @Tinus - we are monitoring

Online Boutique

Shay

APP 9:12 AM

Not this time!, I just got a few alerts mentioning severe errors popping up in PROD

Bob

APP 9:12 AM

Weird... a few users just complained they are unable to complete their orders. Feels... off..

swetha.nayudu

9:12 AM

@Bob - the users are global ?

Bob

APP 9:12 AM

Sure, let me look at my reports

9:13

Here are some of the complaints we've received in the last few minutes. It's coming all across the globe

9:13

Germany - "I added items to my cart, clicked checkout, and it just kept

spinning. Then it dumped me back to an empty cart"

9:13

USA - "Order failed twice, and now the cart is empty. I refreshed, but now the site is laggy"

9:13

Japan - "Got to checkout, then error 502. Tried again - cart gone"

9:13

To sum it all, we have got 240+ reports globally

9:13

(12 kB)

<https://i.ibb.co/7csQGjg/Lvl-26-reports-2.webp>

swetha.nayudu

9:13 AM

@Shay - PLease look into the errors

Shay

APP 9:13 AM

Here's the list of today's changes. Hope this helps <https://uptime-labs.atlassian.net/wiki/external/YzYwYTAxNWQzOTI0NDYzOWI1MjkxNTI2YmVmMjUyZDE>

9:13

Looking into logs now

9:13

Found these below error logs

9:13

```
app[checkout-service] [ERROR] - write() failed, Read-only filesystem
app[checkout-service] Order submission failed for session_id=ae43f9 due to I/
O error
app[checkout-service] [ERROR] - Transaction commit failed, Read-only file
system
[ERROR] nginx[3245] - 502 Bad Gateway while accessing upstream checkout
service
[ERROR] nginx[3245] - 504 Gateway Timeout while accessing upstream
checkout service
```

9:13

The server is too slow and give up while responding back. I'm not sure why read-only errors are there

Daniel

APP 9:14 AM

Looking at the above logs, app looks fine. But system can't write new data. Errors suggests to be an infra component failure

swetha.nayudu

9:14 AM

Read ONLY can you please see if its related to permission to the files ?

Daniel

APP 9:14 AM

Also checkout servers show CPU and memory limits exceeded alerts, this definitely looks bigger than just an app issue

9:14

app[checkout-service]: systemd[1][WARN] Resource usage threshold exceeded - CPU: 96%, Memory: 92%

Shay

APP 9:14 AM

Could this be due to load or any changes ?

swetha.nayudu

9:14 AM

@Tanya - please jump in

Tanya

APP 9:14 AM
Checking infra...

9:14

All four checkout servers are maxed out - CPU, memory, and disk I/O all spiking.
No changes or deployments were done from platform side

9:14

(92 kB)
<https://i.ibb.co/SwdqW9vX/checkout-servers-spike-simultaneous.webp>

swetha.nayudu

9:15 AM

It can be load

Tanya

APP 9:15 AM

It doesn't look like a load issue either. CPU and Memory spike is not matching with incoming traffic

9:15

I'm seeing a running process called init_locker.sh eating up most of the CPU on the checkout server. That's not something we usually run. Something's suspicious here

9:15

(12 kB)
<https://i.ibb.co/RtWsqrY/process-Running.webp>

swetha.nayudu

9:15 AM

@Tanya @Shay@Daniel - please see if there is any unusual activity / traffic ?

9:15

@Bob - please send comms to the customers

Bob

APP 9:16 AM

Sure, any specific message we want to get across

Tanya

APP 9:16 AM

I will monitor traffic and report anything suspicious

Daniel

APP 9:16 AM

I haven't seen this script before

swetha.nayudu

9:16 AM

say some customer unabel to coplete the order and we are woking to get it back as soon as possible

Shay

APP 9:16 AM

Shall we kill the script?

swetha.nayudu

9:17 AM

its a concern how we got this script if developers havent seen this

is this a securty concern

9:17

Daniel

APP 9:17 AM

These symptoms are very unusual. We should think of getting SecOps here now

swetha.nayudu

9:17 AM

@Maya - can you please help here

Maya

APP 9:17 AM

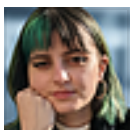

Let me check if there's anything suspicious

swetha.nayudu

9:17 AM

the team can see some scripts which is not identified

Maya

APP 9:17 AM

Weird!! Security agent known as EDR(Endpoint Detection and Response) is missing from all 4 checkout servers. That's? concerning

9:17

EDR is basically our endpoint defense tool, it tracks unusual activity at the servers

9:18

Also,I found an init_locker.sh script encrypting DB, app, and log files which is renaming the filename like below

9:18

order_log_2025-06-01.locked

session_state.tmp.locked

Daniel

APP 9:18 AM

this explains why there were errors in checkout logs saying write failed , read-only filesystem

Tanya

APP 9:18 AM

Wait... there's a file here named HELP_ME_DECRYPT.txt. I opened it, appears a ransom note. This doesn't look good

9:18

(27 kB)

<https://i.ibb.co/HDcr1Rzb/ransomnote.webp>

Maya

APP 9:18 AM

Confirmed. This is a ransomware breach. @Swetha Nayudu inform business about this

Tanya

APP 9:18 AM

Shall i try killing this script ?

Bob

APP 9:18 AM

Guys!!! User complaints are sky rocketing, its turning catastrophic!

swetha.nayudu

9:19 AM

@Hamed @Tinus - we have ransomware breach

9:19

need your input

Maya

APP 9:20 AM

Killing the script could make things worse, higher ransom or losing data forever

9:20

@Swetha Nayudu before we do anything, I'd request everyone to please change their passwords

9:20

Also I'm removing everyone's access to servers - only I'll have control for now. Later we will reassess to do any activity further

Hamed

APP 9:20 AM

I agree with maya

swetha.nayudu

9:20 AM

@Tanya - please don't do anything

Daniel

APP 9:20 AM

Done on my end

Hamed

APP 9:20 AM

Updated. @Maya smart move by limiting server's access

Shay

APP 9:20 AM

Password updated

Bob

APP 9:20 AM

Changed mine too. Better safe than sorry

Tanya

APP 9:20 AM

All set

swetha.nayudu

9:20 AM

All here and @bob 0 sent internal comms to change the pwd

Tanya

APP 9:20 AM

It's much worse now. Every file I check is encrypted, nothing can be opened or recovered.

Shay

APP 9:20 AM

I'm seeing new errors on frontend now. How's it for you @Swetha Nayudu ?

Maya

APP 9:20 AM

Attention! when it comes to potential security breaches, it's important we don't discuss sensitive details here

9:20

I'm setting up private channel...

9:21

@Swetha Nayudu before we move to private channel, can you check with business what's the plan - are we paying the ransom or moving with response?

swetha.nayudu

9:21 AM

yes please

9:21

you set the provate channel

9:22

guys -please dont tell everyone, no one says a single thing outside online-boutique!

9:22

@Bob - can we please get the holding page up in the site

Hamed

APP 9:22 AM

Bob

APP 9:22 AM

Tanya

APP 9:22 AM

Daniel

APP 9:22 AM

Bob

APP 9:26 AM

@Swetha Nayudu user complaints are spiking. They're reporting the site is down, earlier it wasn't the case. What should I tell them now?

Hamed

APP 9:28 AM

Confirm, all good here

Daniel

APP 9:28 AM

Same here

Tanya

APP 9:28 AM

Same here

Maya

APP 9:41 AM

Do we go ahead and mark this incident as closed?

Tanya

APP 9:42 AM

That's the traffic at 100%

swetha.nayudu

9:42 AM

Yes please we can close this incident ... but please monitor this closely

Tanya

APP 9:42 AM

9:43

That was intense. We've never been this close to total loss before. We got lucky

Daniel

APP 9:43 AM

Systems are calm now, but that feeling earlier... not something I want to go through again

Bob

APP 9:43 AM

One small slip caused a major breach. We need better awareness to prevent this in future

Tinus

APP 9:43 AM

This could've gone way worse. Appreciate how quickly and cleanly you handled it

Bez

APP 9:43 AM

Not every day we survive an attack like this. You made the right calls, fast. Great job, @Swetha Nayudu - that's how we bounce back

Private Channel

UptimeLabs

APP 9:10 AM

joined private-comms-6224. Also,
Hamed S
and 20 others joined via invite.

Maya

APP 9:23 AM

@Swetha Nayudu let's build the core response team here. I've already added myself. Who else should we pull in to keep it tight and efficient?

9:23

I'd say one senior person each from security, platform, and engineering. Also add Tanya, tasks could be platform intensive

swetha.nayudu

9:24 AM

@Maya - Tinus suggested - We've got Cyvantics Security on retainer if you need them

9:24

@Tanya

Tanya

APP 9:24 AM

was added to private-comms-6224 by
swetha.nayudu

.

Maya

APP 9:24 AM

Yes, we've got an IR(incident response) retainer with Cyvantics Security

swetha.nayudu

9:24 AM

@Hamed @Tinus @Bez @Daniel

Hamed

APP 9:24 AM

was added to private-comms-6224 by
swetha.nayudu

. Also,

Tinus

and 2 others joined via invite.

Maya

APP 9:25 AM

Looped in Cyvantics Security - they're on their way now to take snapshots of the infected server and storage, followed by forensics on it

swetha.nayudu

9:25 AM

@Bob

Bob

APP 9:25 AM

was added to private-comms-6224 by swetha.nayudu

Maya

APP 9:25 AM

Meanwhile, I've got this from Cyvantics. @Swetha Nayudu, can you help track the steps and coordinate?

9:25

<https://uptime-labs.atlassian.net/wiki/external/MThjMTk4ZDU5ODU0NGZmMWE1NzhmNGY0MDQwNWI1NTA>

swetha.nayudu

9:25 AM

Guys , please let discuss the details in this channel

Maya

APP 9:25 AM

We've got isolation steps in the playbook, but before we dive in, can you paste that list here? I'll help team run through it

swetha.nayudu

9:25 AM

1. Disconnect the infected server -> Platforms
2. Cut off infrastructure traffic -> Platforms

3. Disconnect DB & freeze backup -> Application
4. Detach from Shared Resource -> Platforms
5. Take snapshots (Disk & Memory) -> Ask team
6. Kill suspicious process or activity -> Platforms

9:26

go for its @Maya

Maya

APP 9:26 AM

I've given write access to Tanya, Hamed, Daniel, and myself

1

Tanya

APP 9:26 AM

Disconnecting the checkout servers from the infra now

Daniel

APP 9:26 AM

I'm on it. Disconnecting DB access for checkout and checking if scheduled backups exist

1

Hamed

APP 9:26 AM

I'll verify if any shared storage is still attached to the checkout DB

1

Daniel

APP 9:26 AM

Step 3 done, DB connection to checkout is now cut

Tanya

APP 9:26 AM

Step 1 done, Checkout servers are now fully disconnected. Moving to isolate the infra from all external traffic

1

Hamed

APP 9:26 AM

Step 4 confirmed, No shared storage attached to checkout, which makes sense since checkout has its standalone storage

Tanya

APP 9:26 AM

Step 2 completed, Infra is now fully cut off from the outside world. That means the website will remain completely down until we recover

1

Maya

APP 9:26 AM

Step 5 done, Cyvantics has completed taking snapshots of the checkout servers and database. They've now moved on to forensics. @Hamed, we're good to kill the script now

Hamed

APP 9:27 AM

Step 6 done, The Script has been killed. @Swetha Nayudu let us know and double-check if anything else is pending on our side

swetha.nayudu

9:27 AM

Can you all please recheck if it all done properly and you cant see any connection ? before we move to restoration

9:28

1. Validate backups → Security
2. Wipe infected systems → Platforms
3. Rebuild from clean backup → Platforms
4. Re-enable security agent on the servers → Security
5. Reconnect traffic to services and monitor → Platforms

Hamed

APP 9:28 AM

Same here

Daniel

APP 9:28 AM

All good here

swetha.nayudu

9:28 AM

Can we please start the restoration

Daniel

APP 9:29 AM

Do we have any backup storage?

Maya

APP 9:29 AM

Yes, we must have a backup. Platform team can confirm us

Hamed

APP 9:29 AM

Correct, we do have backup which only runs at 2AM. Latest is yesterday's.
We'll lose today's orders

Maya

APP 9:29 AM

Isolation is complete. We're good to move toward restoration using the backup storage now

9:29

@Swetha Nayudu could you please confirm with business before moving forward on this

9:29

I've called in @Bob to the channel

Bob

APP 9:29 AM

@Swetha Nayudu, I hear you need my help, what exactly should I look into?

9:30

With the sale starting today, the potential loss is significant - around \$180k

Maya

APP 9:31 AM

Are we good with business on this loss of \$180k worth of orders ?

swetha.nayudu

9:31 AM

@Bob @Hamed @Tinus - We have a situation where system back up will be upto 2 AM

9:31

and we will loose all orders worth loss of \$180K

Tinus

APP 9:32 AM

If you check with Bez, he should know more on this

1

swetha.nayudu

9:32 AM

he is chceeking for insurabce

9:33

Guys lets move forward with restoration

9:33

We have a situation where system back up will be upto 2 AM

[2:31 PM] and we will loose all orders worth loss of \$180K

Maya

APP 9:33 AM

Thanks for the go-ahead. @Swetha Nayudu, please track all restoration steps

9:33

I'm now validating the backup storage to ensure it's safe

Hamed

APP 9:33 AM

I'm provisioning new checkout servers, will update once ready

Maya

APP 9:33 AM

Backup is clean and safe. @Hamed, you can start rebuilding checkout from backup storage

swetha.nayudu

9:33 AM

1. Validate backups → Security
2. Wipe infected systems → Platforms
3. Rebuild from clean backup → Platforms
4. Re-enable security agent on the servers → Security
5. Reconnect traffic to services and monitor → Platforms
- 6.

Hamed

APP 9:33 AM

Thanks, Maya. New servers are ready. I'll start rebuilding now using backup storage

9:33

Rebuild completed

Maya

APP 9:33 AM

I've enabled the security agents (EDR) on checkout servers

Daniel

APP 9:33 AM

I'll monitor application health once services are restored

Maya

APP 9:33 AM

@Swetha Nayudu , can you confirm all tasks are wrapped up and we are good to bring the traffic back? Just want to be sure, as this is the final restoration step before we move

swetha.nayudu

9:34 AM

@Maya - looks like all above steps are completed

9:35

@Tanya - can you please reconnect 10% of traffic to start with

Tanya

APP 9:35 AM

Thanks for the go ahead. Bringing up network traffic in progress...

9:35

Restoration completed

swetha.nayudu

9:35 AM

@Daniel @Tanya @Maya - please monitor closely

Daniel

APP 9:36 AM

Sure

Bob

APP 9:36 AM

Wait!! getting a bunch of new complaints now. Users are neither able to see their return requests nor able to place new returns on the site

Tanya

APP 9:36 AM

on it

Maya

APP 9:36 AM

Yeah, that's probably the missing today's checkout data. Anyone who ordered or returned something during that time won't see it - makes sense since we

restored from the yesterday's backup

Tanya

APP 9:36 AM

Tough, but expected :)

Bob

APP 9:36 AM

What should I tell them? They are asking for refunds

swetha.nayudu

9:37 AM

Please tell them we will get back to them shortly

Bob

APP 9:37 AM

Users are going bad, continuously asking for their refunds !

swetha.nayudu

9:37 AM

Pur priority is to get the system back and safe

9:37

@Daniel @Tanya - how is the monitoring looking ?

Daniel

APP 9:38 AM

Everything seems to be in tact

Tanya

APP 9:38 AM

No anomalies observed

swetha.nayudu

9:38 AM

ok @Tanya - please open traffic to 30 %

Bob

APP 9:38 AM

What are business thoughts on this?

Tanya

APP 9:38 AM

On it

9:39

Complete

Maya

APP 9:40 AM

@Swetha Nayudu I've received the forensics report from Cyvantics Security

9:40

(85 kB)

<https://i.ibb.co/q3Jp58dv/CONFIDENTIAL-6-page-0001.webp>

9:40

Also, I just finished combing through Shay's mailbox. There's something

important here, I found two emails from what looks like our monitoring vendor - ClearTech

9:40

(103 kB)

<https://i.ibb.co/VpLJHh7y/CT-20250829-055655-0000.webp>

9:41

We will take this forward in PIR , for now website is restored

9:41

Alright, since everything's back up and stable, we can now move back to the main #online-boutique channel. No further actions left here

swetha.nayudu

9:41 AM

@Tanya - please open all the traffic now

Tanya

APP 9:41 AM

Understood

swetha.nayudu

9:42 AM

@Bob - Bez suggested to tell customers - Keeping it high-level, just say website restored, but there's an issue with few orders. We'll refund them, and customers will get a \$10 gift voucher as an apology

UptimeLabs

APP 9:44 AM

archived #private-comms-6224. The contents will still be browsable and

available in search.
