yeshwanth.tp
and 28 others joined via invite.

yeshwanth.tp

APP 6:13 AM

Incident Number INC100078: - P1 - Website is unable to Checkout the cart
Items and Sessions IDs are being displaced on Front end page

Bez

APP 6:13 AM

I'm seeing some posts on social media about issues with our platform, is this a
regional issue or hitting customers globally?

6:13

Is it a global issue ?

yeshwanth.tp

6:14 AM

@Bez We are in a P1, I am working with team to get the Impact and Revenue
loss and time to fix

6:17

@Bez,

Just an update to Business,

Below are the Impacted countries and Services

Germany - "I added items to my cart, clicked checkout, and it just kept spinning. Then it dumped me back to an empty cart"

USA - "Order failed twice, and now the cart is empty. I refreshed, but now the site is laggy"

Japan - "Got to checkout, then error 502. Tried again - cart gone"

To sum it all, we have got 240+ reports globally

Bez

APP 6:19 AM

Customers have gone outrageous. #OBFail and #OBStealsSale are trending with frustrated posts. We're getting hammered online! Where are we @yeshwanth.tp?

yeshwanth.tp

6:24 AM

@Bez, I am working with Technical Team, to resolve asap
Team has indentified that Issues are from Platform Side

Bez

APP 6:26 AM

Got an email claiming responsibility by "BlackCrow Group" and demanding payment of \$5M in crypto. Honestly, I get these hoax emails all the time, so I'm not buying it

6:27

Wait! you're telling me this is an actual ransomware hit?

6:28

Alright, tell everyone, no one says a single thing outside online-boutique! I don't care who's asking, not a word until we know exactly what's going on!

6:30

Just got another ransom email, says we tried to interfere and now the price doubled. Was something stupid done on our side?

6:30

This is nightmare! @yeshwanth.tp where are we right now?

yeshwanth.tp

6:33 AM

@Bez,

Team has identified below as root cause and working on the fix,

1. Yes, you are right there is a BlackCrow Group has hacked out websites
2. More number of unwanted threads are killing CPU and Memory
3. 502 / 504 badgateways from Checkout services

Team is working on fix and will provide an update once issues are fixed

6:35

@Bez / @Tinus,

Below are recommendations from Security Team

Suggest business to change their passwords and also check if we are going to pay the ransom

And Security team would like to know business decision on paying the ransom or moving with response?

Bez

APP 6:35 AM

Not in favor of paying. Ethically, it sets the wrong example and there's no real guarantee we'll get anything back

Tinus

APP 6:35 AM

Agree. Also, just to be clear - we don't need to alert the ICO (Information Commissioner's Office) right this second. We've got up to 72 hours, but that depends on how serious this really is

Bez

APP 6:36 AM

@Tinus do you think this is something we should loop in any cyber security agency for?

Tinus

APP 6:36 AM

If it looks like a complete lock-out, I'd say yes

6:36

We've got Cyvantics Security on retainer - just in case this gets out of hand.
@yeshwanth.tp, ask Maya to reach out if needed

Bez

APP 6:39 AM

@yeshwanth.tp I need a clear answer from the team. What exactly is affected right now?

Tinus

APP 6:39 AM

You're right. We need clear facts - which systems are locked, which are safe

yeshwanth.tp

6:41 AM

@Bez Since it is related to security , Private Chat has been created

Bez

APP 6:41 AM

Do we have any backup storage? Maybe we can try restoring from that

6:42

Keep me updated in the business chat here. I've to answer a lot of people ahead of me in the board

yeshwanth.tp

6:44 AM

@Bez - As suggested by Secirty Team that Isolation Steps are completed are we good to move with Restoration steps?

Bez

APP 6:44 AM

Do we have point to point backup ?

6:44

Losing this much worth of data isn't good. However we do have insurance, let me check

6:45

We're insured for up to \$1M for such losses. Once we're back up, we'll take it forward with the insurer

Tinus

APP 6:45 AM

In that case, we can proceed with the restoration from backup - it's our best option right now

Bez

APP 6:45 AM

Agreed. @yeshwanth.tp let's move forward

yeshwanth.tp

6:45 AM

Thank you

Bez

APP 6:45 AM

Update me as soon as it'll be recovered. Board members are getting impatient

yeshwanth.tp

6:46 AM

Sure @Bez

Bez

APP 6:48 AM

Keeping it high-level, just say website restored, but there's an issue with few orders. We'll refund them, and customers will get a \$10 gift voucher as an apology

6:48

Bob told me about this, so i've asked him to go with the refunds

yeshwanth.tp

6:49 AM

@Bez, Restoration CCompleted and Website is back Online

6:49

I tried placing the order and its successful
This file was deleted.

Bez

APP 6:49 AM

Since services are restored, I'm heading to speak with compliance and the

regulators. Thankfully, no data was leaked, that helps

1

yeshwanth.tp

6:49 AM

Will monitor the systems for some more time

Tinus

APP 6:49 AM

I'm on my way to the ICO (Information Commissioner's Office - UK) office now. I'll get the formal report rolling - that's required for the insurance claim. Keep monitoring in the meantime

yeshwanth.tp

6:49 AM

Thank you All

Online Boutique

Shay

APP 6:10 AM

Not this time!, I just got a few alerts mentioning severe errors popping up in PROD

Bob

APP 6:10 AM

Weird... a few users just complained they are unable to complete their orders. Feels... off..

yeshwanth.tp

6:10 AM

All, We have a Big Day Today - Lets Monitor our systems closely

Shay

APP 6:11 AM

I'm getting a lot of alerts in PROD

Bob

APP 6:11 AM

Customer complaints are increasing

yeshwanth.tp

6:11 AM

@Shay, Can you please perform a check on the website and see what is failing

Shay

APP 6:11 AM

Sure

6:12

I tried to place an order, but it said empty cart at the end

yeshwanth.tp

6:12 AM

Team I am raising an P1 Incident

UptimeLabs

APP 6:13 AM

Incident record created

6:13

Send first comms in first 5 minutes

yeshwanth.tp

6:15 AM

@Bob Can you please get what all is impacted and revenue loss due to this P1 and which location is impacted.

I did a check out of a Glasses and observed that I am unable to check out successfully, basket items are being disappeared

Bob

APP 6:15 AM

Sure, let me look at my reports

6:15

Here are some of the complaints we've received in the last few minutes. It's coming all across the globe

6:15

Germany - "I added items to my cart, clicked checkout, and it just kept spinning. Then it dumped me back to an empty cart"

6:15

USA - "Order failed twice, and now the cart is empty. I refreshed, but now the site is laggy"

6:15

Japan - "Got to checkout, then error 502. Tried again - cart gone"

6:15

To sum it all, we have got 240+ reports globally

6:15

(12 kB)

<https://i.ibb.co/7csQGjg/Lvl-26-reports-2.webp>

yeshwanth.tp

6:16 AM

@Bob / @Hamed S, Can anyone please check is there anything which Release to Production today
Can you please get the CR;s and check the logs

Hamed

APP 6:16 AM

<https://uptime-labs.atlassian.net/wiki/external/YzYwYTAxNWQzOTI0NDYzOWI1MjkxNTI2YmVmMjUyZDE>

6:16

These are the above changes that went into PROD

Shay

APP 6:17 AM

Again i've got an alert

yeshwanth.tp

6:18 AM

@Hamed, Can you please check is there any this which is causing failures?

Hamed

APP 6:18 AM

For that we need dev teams to do the initial triaging

Shay

APP 6:19 AM

Looking into logs now

6:19

Found these below error logs

6:19

app[checkout-service] [ERROR] - write() failed, Read-only filesystem

app[checkout-service] Order submission failed for session_id=ae43f9 due to I/O error
app[checkout-service] [ERROR] - Transaction commit failed, Read-only file system
[ERROR] nginx[3245] - 502 Bad Gateway while accessing upstream checkout service
[ERROR] nginx[3245] - 504 Gateway Timeout while accessing upstream checkout service

6:19

The server is too slow and give up while responding back. I'm not sure why read-only errors are there

yeshwanth.tp

6:19 AM

@Daniel - Please involve your team member and can you check what is going wrong?

Daniel

APP 6:19 AM

Looking at the above logs, app looks fine. But system can't write new data. Errors suggests to be an infra component failure

6:20

Also checkout servers show CPU and memory limits exceeded alerts, this definitely looks bigger than just an app issue

6:20

app[checkout-service]: systemd[1][WARN] Resource usage threshold exceeded - CPU: 96%, Memory: 92%

Shay

APP 6:20 AM

Could this be due to load or any changes ?

yeshwanth.tp

6:20 AM

@Maya Also I am seeing Session IDs on the front end screen - Please take a look

This file was deleted.

Maya

APP 6:21 AM

Is it something concerning?

yeshwanth.tp

6:21 AM

@Shay What does that error mean ? Can you check is it frequently error's are just new errors during the isseus?

How can we fix this?

Shay

APP 6:21 AM

These errors are coming since last 15 mins

6:21

And i havent seen such errors till now

yeshwanth.tp

6:22 AM

@Maya - Yes Session IDs should not shown, as per the security policy

Hamed

APP 6:22 AM

None of the changes are aligning with the errors in the logs

yeshwanth.tp

6:22 AM

@Shay How can we resolve this errors?

Shay

APP 6:22 AM

All the errors are suggesting to be platform issue and its suspicious to see such issues at the first hand

yeshwanth.tp

6:23 AM

@Daniel Can you please check Check out and Cart services as we have more failures there

Daniel

APP 6:23 AM

I have checked the checkout service and there are lot of write failed errors. And to be very honest this looks very suspicious

yeshwanth.tp

6:23 AM

@Hamed, Can you please involve your team to debug this and provide fix asap

6:23

As we are losing business

Hamed

APP 6:24 AM

Sure , @Tanya please

Tanya

APP 6:24 AM

Checking infra...

6:24

All four checkout servers are maxed out - CPU, memory, and disk I/O all spiking. No changes or deployments were done from platform side

Bob

APP 6:24 AM

So far 22% of users have already complained about it

Tanya

APP 6:24 AM

(92 kB)

<https://i.ibb.co/SwdqW9vX/checkout-servers-spike-simultaneous.webp>

6:24

It doesn't look like a load issue either. CPU and Memory spike is not matching with incoming traffic

6:24

I'm seeing a running process called init_locker.sh eating up most of the CPU on the checkout server. That's not something we usually run. Something's suspicious here

6:24

(12 kB)

<https://i.ibb.co/RtWsqrY/process-Running.webp>

yeshwanth.tp

6:25 AM

@Hamed, Please suggest would you like to allocate more memory and CPU to applications ? or restart the applications if we have multiple replicas?

Hamed

APP 6:25 AM

Both the app and infra are struggling, which is very strange. Need SecOps on this asap

6:25

We have already scaled up to max of our capacities

yeshwanth.tp

6:26 AM

@Tanya / @Maya - Please check which process is this and take necessary actions

Maya

APP 6:26 AM

Let me check if there's anything suspicious

6:26

Weird!! Security agent known as EDR(Endpoint Detection and Response) is missing from all 4 checkout servers. That's? concerning

6:26

EDR is basically our endpoint defense tool, it tracks unusual activity at the servers

6:26

Also,I found an init_locker.sh script encrypting DB, app, and log files which is renaming the filename like below

6:26

order_log_2025-06-01.locked

session_state.tmp.locked

Daniel

APP 6:26 AM

this explains why there were errors in checkout logs saying write failed , read-only filesystem

Tanya

APP 6:26 AM

Wait... there's a file here named HELP_ME_DECRYPT.txt. I opened it, appears a ransom note. This doesn't look good

6:26

(27 kB)

<https://i.ibb.co/HDcr1Rzb/ransomnote.webp>

Maya

APP 6:27 AM

Confirmed. This is a ransomware breach. @yeshwanth.tp inform business about this

yeshwanth.tp

6:27 AM

Its a 502 / 504 Bad Gateway erros from Check out services

[ERROR] nginx[3245] - 502 Bad Gateway while accessing upstream checkout service

[ERROR] nginx[3245] - 504 Gateway Timeout while accessing upstream checkout service

Tanya

APP 6:27 AM

Shall i try killing this script ?

Bob

APP 6:27 AM

Guys!!! User complaints are sky rocketing, its turning catastrophic!

yeshwanth.tp

6:27 AM

Can anyone check all good at checkout services?

Hamed

APP 6:28 AM

We have been breached by the attackers claiming themselves from "BlackCrow Group"

yeshwanth.tp

6:28 AM

@Hamed - Please check checout services are accessible and increase the CPU and memory at the moment till we solve P1

Shay

APP 6:28 AM

We should kill this suspicious process asap

yeshwanth.tp

6:28 AM

@M@Hamed S Please provide those IPs to @Maya, can block those IPs

Hamed

APP 6:29 AM

there are no suspicious IP activity i can see in my network dashboard at the moment. Its a ransomware breach

yeshwanth.tp

6:29 AM

@Shay - Please go head and take necessary actions to restart those services which have high utilization and kill unwanted process

6:29

@Hamed Please suggest how can we solve the problem?

Tanya

APP 6:29 AM

Ok , killing the script now...

6:30

Tried killing the script, all checkout servers just rebooted with a ransom banner. New ransom note say: "Interruption detected. Price doubled. Pay \$10M in Bitcoin"

Hamed

APP 6:30 AM

Maya has the expertise on this. She is the best one to be on this

Maya

APP 6:30 AM

Killing the script could make things worse, higher ransom or losing data forever

6:30

@yeshwanth.tp before we do anything, I'd request everyone to please change their passwords

6:30

Also I'm removing everyone's access to servers - only I'll have control for now. Later we will reassess to do any activity further

Daniel

APP 6:30 AM

Done on my end

yeshwanth.tp

6:30 AM

Is there any other issues reported?

I would like to give updates to business, mean while you team please try to resolve the identified issues and check all good at website

Hamed

APP 6:31 AM

Updated. @Maya smart move by limiting server's access

Shay

APP 6:31 AM

Password updated

Bob

APP 6:31 AM

Changed mine too. Better safe than sorry

Tanya

APP 6:31 AM

All set

6:31

It's much worse now. Every file I check is encrypted, nothing can be opened or recovered.

Shay

APP 6:31 AM

I'm seeing new errors on frontend now. How's it for you @yeshwanth.tp ?

Maya

APP 6:31 AM

@yeshwanth.tp Suggest business to change their passwords and also check if we are going to pay the ransom

6:31

Attention! when it comes to potential security breaches, it's important we don't discuss sensitive details here

6:31

I'm setting up private channel...

6:31

@yeshwanth.tp before we move to private channel, can you check with business what's the plan - are we paying the ransom or moving with response?

6:35

Let move to private channel

yeshwanth.tp

6:36 AM

@Hamed S and @Shay How is CPU and memory looking

Maya

APP 6:36 AM

By the side you can see another channel is being created

yeshwanth.tp

6:37 AM

Team I still can see some issues on WEbsite

Checkout Failed

We encountered a critical error while processing your checkout. Please see the details below:

Error Code: HTTP-503

Error Message: Unable to process new requests due to system degradation.

Order ID: fb272a40-aa7b-11f0-9aec-8edadb5779ce

Our team is investigating this issue. If the problem persists, please contact support for further assistance.

Hamed

APP 6:37 AM

CPU is still spiking up . They have got hold of our systems. We need a plan from Maya

yeshwanth.tp

6:37 AM

@Hamed Please check Check Out Services are up and running

Bob

APP 6:40 AM

@yeshwanth.tp user complaints are spiking. They're reporting the site is down, earlier it wasn't the case. What should I tell them now?

UptimeLabs

APP 6:45 AM

- You have less than 5 minutes. You can type /help if you need any reminders.

6:48

- You have less than 2 minutes. You can type /help if you need any reminders.

Tanya

APP 6:49 AM

That was intense. We've never been this close to total loss before. We got lucky

Daniel

APP 6:49 AM

Systems are calm now, but that feeling earlier... not something I want to go through again

Bob

APP 6:49 AM

One small slip caused a major breach. We need better awareness to prevent this in future

Tinus

APP 6:49 AM

This could've gone way worse. Appreciate how quickly and cleanly you handled it

Maya

APP 6:49 AM

Do we go ahead and mark this incident as closed?

Bez

APP 6:49 AM

Not every day we survive an attack like this. You made the right calls, fast. Great job, @yeshwanth.tp - that's how we bounce back

Private Channel

UptimeLabs

APP 6:06 AM

joined private-comms-6327. Also, Hamed S and 20 others joined via invite.

Maya

APP 6:36 AM

@yeshwanth.tp let's build the core response team here. I've already added myself. Who else should we pull in to keep it tight and efficient?

6:36

I'd say one senior person each from security, platform, and engineering. Also add Tanya, tasks could be platform intensive

6:37

Here

yeshwanth.tp

6:38 AM

@Maya, Lets add @Bez / @Tinus for now

Bez

APP 6:38 AM

was added to private-comms-6327 by yeshwanth.tp

. Also,

Tinus

joined via invite.

Maya

APP 6:38 AM

Yes, we've got an IR(incident response) retainer with Cyvantics Security

6:39

Looped in Cyvantics Security - they're on their way now to take snapshots of the infected server and storage, followed by forensics on it

Bez

APP 6:39 AM

Me and Tinus will be there in business chat. @yeshwanth.tp please move with the response

yeshwanth.tp

6:39 AM

@Bez,

We have an update from Platform Team that, CPU are still hiking and its a Security Issues and resolution can be provided by Security team

Maya

APP 6:39 AM

Meanwhile, I've got this from Cyvantics. @yeshwanth.tp, can you help track the steps and coordinate?

6:39

<https://uptime-labs.atlassian.net/wiki/external/MThjMTk4ZDU5ODU0NGZmMWE1NzhmNGY0MDQwNWl1NTA>

6:39

We've got isolation steps in the playbook, but before we dive in, can you paste that list here? I'll help team run through it

6:40

I'll run through all the steps of isolation and restoration. @yeshwanth.tp your task is just to keep a track of them

yeshwanth.tp

6:40 AM

Okay

Maya

APP 6:40 AM

I have added Hamed, Daniel and Tanya in here

6:40

I've given write access to Tanya, Hamed, Daniel, and myself

Tanya

APP 6:40 AM

Disconnecting the checkout servers from the infra now

Daniel

APP 6:40 AM

I'm on it. Disconnecting DB access for checkout and checking if scheduled backups exist

Hamed

APP 6:40 AM

I'll verify if any shared storage is still attached to the checkout DB

Daniel

APP 6:41 AM

Step 3 done, DB connection to checkout is now cut

Tanya

APP 6:41 AM

Step 1 done, Checkout servers are now fully disconnected. Moving to isolate the infra from all external traffic

Hamed

APP 6:41 AM

Step 4 confirmed, No shared storage attached to checkout, which makes sense since checkout has its standalone storage

Tanya

APP 6:41 AM

Step 2 completed, Infra is now fully cut off from the outside world. That means the website will remain completely down until we recover

Maya

APP 6:41 AM

Step 5 done, Cyvantics has completed taking snapshots of the checkout servers and database. They've now moved on to forensics. @Hamed, we're good to kill the script now

Hamed

APP 6:41 AM

Step 6 done, The Script has been killed. @yeshwanth.tp let us know and double-check if anything else is pending on our side

yeshwanth.tp

6:42 AM

@Hamed - Did we cut off the Infra traffic?

Hamed

APP 6:42 AM

Yes Tanya has done it

yeshwanth.tp

6:42 AM

Okay If Isolation steps are completd , Lets work on Restoration Steps

Maya

APP 6:42 AM

Yes, we must have a backup. Platform team can confirm us

yeshwanth.tp

6:42 AM

Thanks @Hamed S

Hamed

APP 6:43 AM

Correct, we do have backup which only runs at 2AM. Latest is yesterday's.
We'll lose today's orders

Maya

APP 6:43 AM

Isolation is complete. We're good to move toward restoration using the backup storage now

6:43

@yeshwanth.tp could you please confirm with business before moving forward on this

6:43

I've called in @Bob to the channel

Bob

APP 6:43 AM

@yeshwanth.tp, I hear you need my help, what exactly should I look into?

6:43

With the sale starting today, the potential loss is significant - around \$180k

Maya

APP 6:43 AM

Backup is only till 2AM today , so we will lose today's orders worth of \$180k

yeshwanth.tp

6:44 AM

@Bez, Please suggest here

Bez

APP 6:45 AM

I've answered it in business. Lets move forward

yeshwanth.tp

6:45 AM

We have got a Go ahead from BUisness

Maya

APP 6:45 AM

Thanks for the go-ahead. @yeshwanth.tp, please track all restoration steps

yeshwanth.tp

6:45 AM

Lets proced with restoration steps

Maya

APP 6:45 AM

I'm now validating the backup storage to ensure it's safe

Hamed

APP 6:45 AM

I'm provisioning new checkout servers, will update once ready

Maya

APP 6:46 AM

Backup is clean and safe. @Hamed, you can start rebuilding checkout from backup storage

Hamed

APP 6:46 AM

Thanks, Maya. New servers are ready. I'll start rebuilding now using backup storage

6:46

Rebuild completed

Maya

APP 6:46 AM

I've enabled the security agents (EDR) on checkout servers

Daniel

APP 6:46 AM

I'll monitor application health once services are restored

Maya

APP 6:46 AM

@yeshwanth.tp , can you confirm all tasks are wrapped up and we are good to bring the traffic back? Just want to be sure, as this is the final restoration step before we move

6:46

Are we good with all the steps before Tanya brings back the traffic again ?

yeshwanth.tp

6:46 AM

Here are the restoration Steps

RESTORATION:

1. **Validate backups** – Check all saved copies of your data to make sure they're not infected by the attack. Only use backups from before the attack started.
2. **Wipe infected systems** – Completely erase (format) any computers or servers that were hit by the attack so no harmful files remain.
3. **Rebuild from clean backup** – Use the safe backup you found earlier to put the system back the way it was before the attack.
4. **Re-enable security tools on servers** – Before putting the systems back on the network, reinstall antivirus, firewalls, and other security software so they're protected.
5. **Reconnect traffic to services and monitor** – Turn the systems back on, let users connect again, and keep a close eye for anything suspicious.

Maya

APP 6:46 AM

All these steps has been done except for the last one

yeshwanth.tp

6:47 AM

Yes then lets take the traffic to new server

Tanya

APP 6:47 AM

Thanks for the go ahead. Bringing up network traffic in progress...

yeshwanth.tp

6:47 AM

and do a health check

Tanya

APP 6:47 AM

Restoration completed

Maya

APP 6:48 AM

Traffic is back again. So far nothing suspicious

Bob

APP 6:48 AM

Wait!! getting a bunch of new complaints now. Users are neither able to see

their return requests nor able to place new returns on the site

yeshwanth.tp

6:48 AM

@Bob, Lets do the health check and get the updates from customers

Maya

APP 6:48 AM

Yeah, that's probably the missing today's checkout data. Anyone who ordered or returned something during that time won't see it - makes sense since we restored from the yesterday's backup

Tanya

APP 6:48 AM

Tough, but expected :)

Bob

APP 6:48 AM

What should I tell them? They are asking for refunds

6:48

users are able to place the orders

yeshwanth.tp

6:48 AM

yes

Maya

APP 6:48 AM

@yeshwanth.tp I've received the forensics report from Cyvantics Security

yeshwanth.tp

6:48 AM

Ordered Successfully
This file was deleted.

Maya

APP 6:48 AM

(85 kB)

<https://i.ibb.co/q3Jp58dv/CONFIDENTIAL-6-page-0001.webp>

6:49

Also, I just finished combing through Shay's mailbox. There's something important here, I found two emails from what looks like our monitoring vendor - ClearTech

6:49

(103 kB)

<https://i.ibb.co/VpLJHh7y/CT-20250829-055655-0000.webp>

6:49

Shall we close the incident ?

6:49

We will take this forward in PIR , for now website is restored

6:49

Alright, since everything's back up and stable, we can now move back to the main #online-boutique channel. No further actions left here

yeshwanth.tp

6:50 AM

Thank you all, Amazing work
Issues resolved

6:50

Yes

UptimeLabs

APP 6:53 AM

archived #private-comms-6327. The contents will still be browsable and
available in search.
